

WARPAGE OF TIME

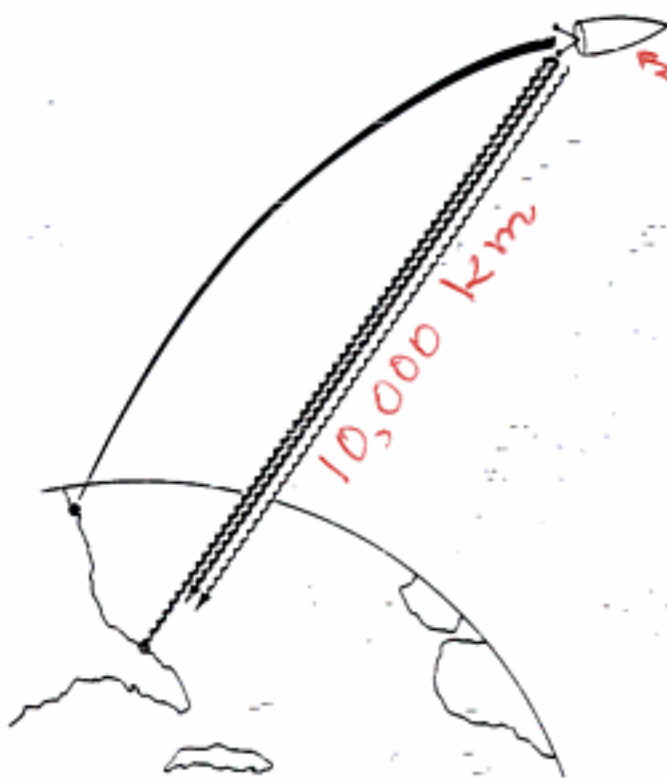

- The flow of time is slowed near the Earth or any other massive body.

NASA's Gravity Probe A

(Robert Vessot et al.
June 18, 1976)

Relativity's prediction:

Time flows faster here than on Earth by 4 parts in 10 billion (4×10^{-10}) (one second each 1000 years)

Clocks' accuracy:
3 parts in 100 trillion (3×10^{-14})

CONFIRMED TO
1/10,000 ACCURACY!
